Continuation Sheet (PTO-303)

Application No.

Continuation of 11. does NOT place the application in condition for allowance because: The claims as written are anticipated by the prior art. Therefore, applicant's arguments are deemed not persuasive.

Continuation of 13. In response to Applicant's arguments the following are the Examiner's observations in regard thereto:

Applicant Argues: The prior art of record does not teach "compensation actions to transform the system resources into a mutually consistent state that differs from an initially consistent state."

Examiner Responds: The feature of bringing the system into a state corresponding to an initial state of the system or into a state different from the initial system state, merely refers to the well-known concept of "semantic compensation". This concept is supported by Section 2.7 of the Patent Cooperation Treaty PCT International Preliminary Examination Report on record.

Applicant's arguments have been fully considered but they are not deemed persuasive. Examiner is entitled to give claim limitations their broadest reasonable interpretation in light of the specification. See MPEP 2111 [R-1] Interpretation of Claims-Broadest Reasonable Interpretation.
